# Over 16 years of RFID Technology experience

- A privately held company started by John Larned in 2000
- A Veteran Owned Small Business located in Rhode Island
- Full service RFID Technology store and Systems Integrator

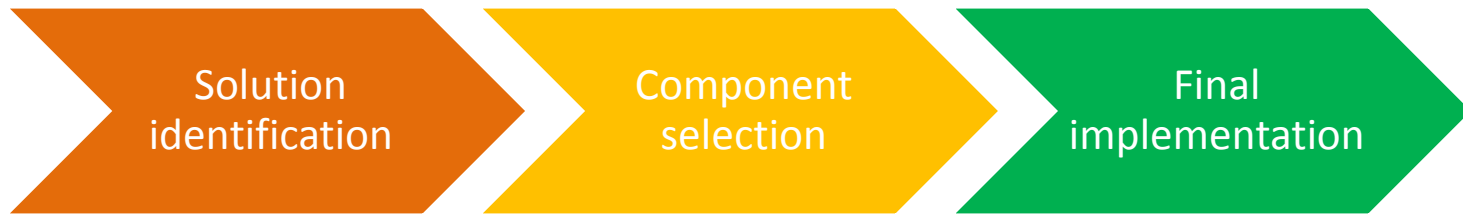

# Our Mission

- We advocate an open platform that combines the best system components specific to the problem at hand.
- We are a global company that brings together the world's best supplies of top quality RFID components and innovative RFID solutions as our technology partners.
- We pride ourselves on providing the very best customer service in every situation from start to finish to follow-thru.

# Our goals for working with you

1. Increase your sales by providing you with compelling RFID solutions at competitive prices.
2. Develop sale-able / scale-able RFID solutions applied to card & access control for businesses, schools, and hospitals.
3. Event management tools.
4. Customized programming.

# Products & Services

- We offer an array of products & solutions in the 3 primary RFID frequency groups:

- 125KHz
- 13.56 MHz
- UHF

- Full service engineering staff & access to factory technology experts allows us to analyze most card types and offer solutions.

## **RFID Clamshell Badges:** PVC / ABS plus lanyard slot

- Cost competitive. Available in standard white or custom match.
- Chip Types: ATA-5577 / Mifare / ICODE-SLIX / UHF / impinj / ALIEN

# ISO Cards

- RFID chip component is the heart of the RFID Access card. We offer card sequential numbering, internal programming, and HICO option.
- Plain PVC and PVC/PET Composite.
- Chip Types: ATA-5577 / Mifare / ICODE-SLIX / UHF, Impinj or Alien
- Options: Numbering /Printing 1c to 4c Both Sides / HICO Mag Stripe / Lanyard Slot Punch.

# Key Fobs

- Chip Types: ATA-5577 / Mifare / ICODE-SLIX / UHF, Impinj or Alien
- We can customize key fobs with sequential numbering & programming, logo graphics, and we offer an assortment of fobs.

# Additional Products Offered

- Tough and versatile InLine Tag transponders are available for mounting on metal, plastic or wood. The tags are lightweight, waterproof and resist high-pressure/high temperature washing conditions according to the highest standard.

- UHF technology enables anti-collision functionality, fast data-rate communication and password protection for precise, reliable reading.

- The handheld RFID reader provides advanced, high efficiency read performance for faster read rates and higher throughput.

# Business Segments

- Card Products & KEYFOB's
- Industrial & Logistic Applications
- Asset Tracking & Tracing
- Waste Management
- U.S. Government & DOD

# Partners

Vizinex RFID designs, engineers and manufactures durable high-performing RFID tags for general and specialized asset tracking applications.

microsensys offers a wide range of standard designs for data transfer and combines RFID reader components together under the brand iID<sup>®</sup> contactless

ecom instruments is a certified manufacturer of rugged communications and mobile appliances for use in explosion protected areas

# Benefits of working with Global

- With over 15 years experience in the RFID world, Global RFID has the abilities to bring your ideas to life.
- Above all, We are committed to providing you with excellent customer service through concept, manufacturing and product delivery to you!
